Luggage Zippers - Exceptional Quality at a Competitive Price.

YKK proudly presents the brand new Racquet Coil zipper.
Especially designed for the luggage industry where resistance to abrasion is a must,
this product was precision engineered to YKK's highest standards.

Lightweight Yet Highly Durable

Using the Weisenbeck Abrasion Test method,
YKK examines a zipper chain's durability by rubbing sandpaper
against the chain to measure its resistance to abrasion.
On conventional zipper chain, after 60 rubs the holding
thread is badly damaged. In contrast,
the Racquet Coil chain withstands up to 100 rubs or more.

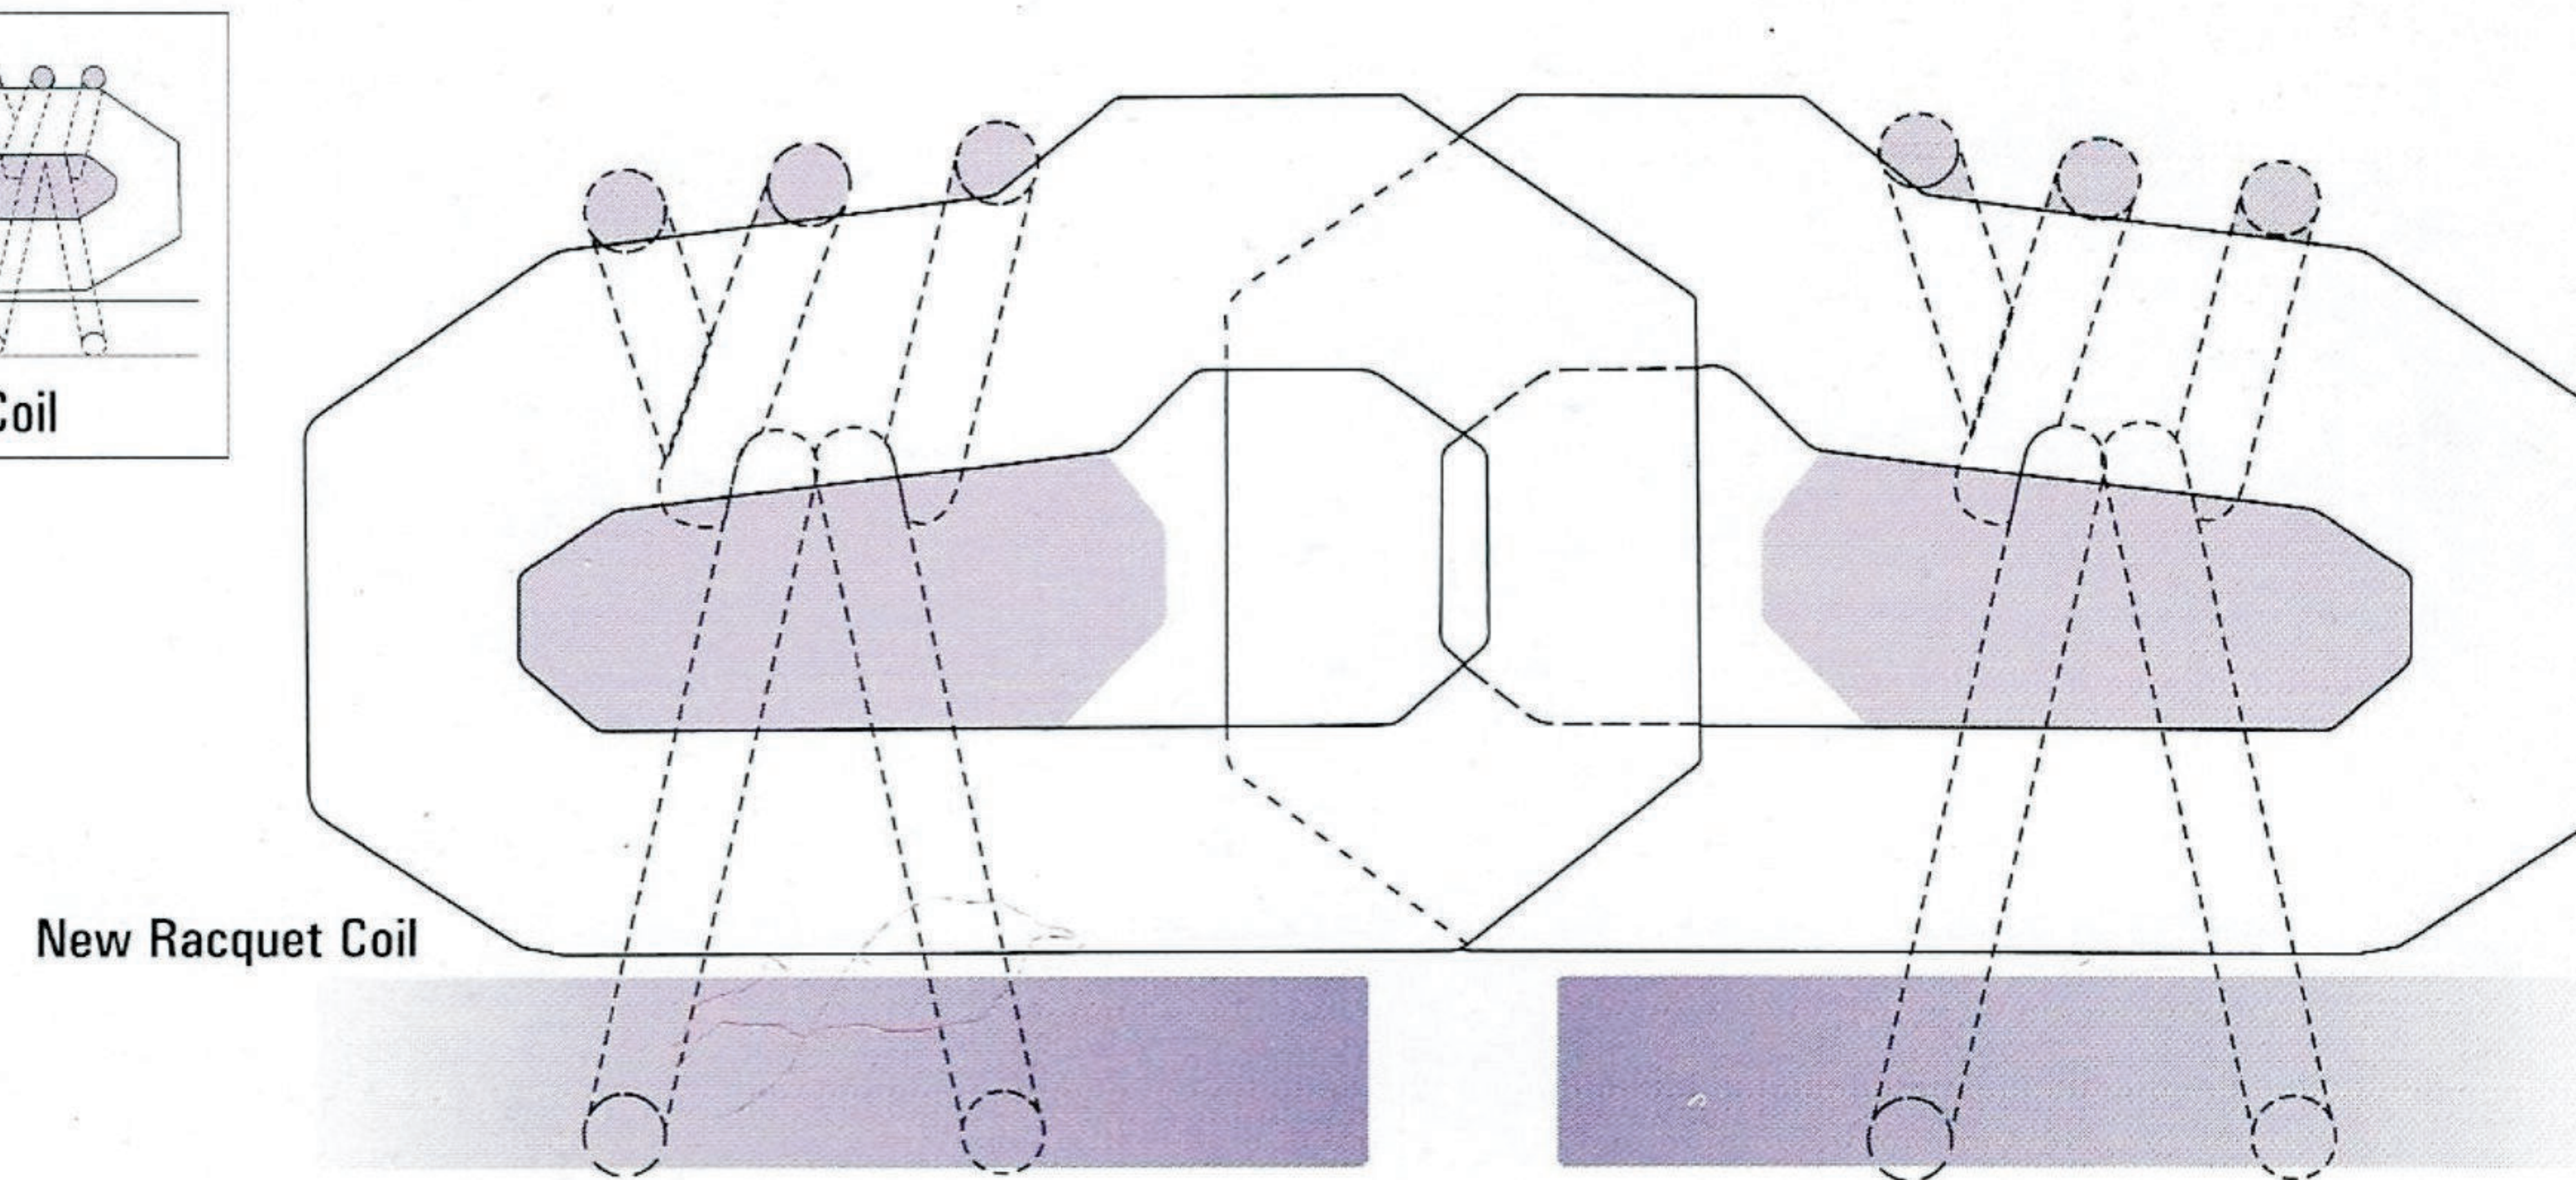

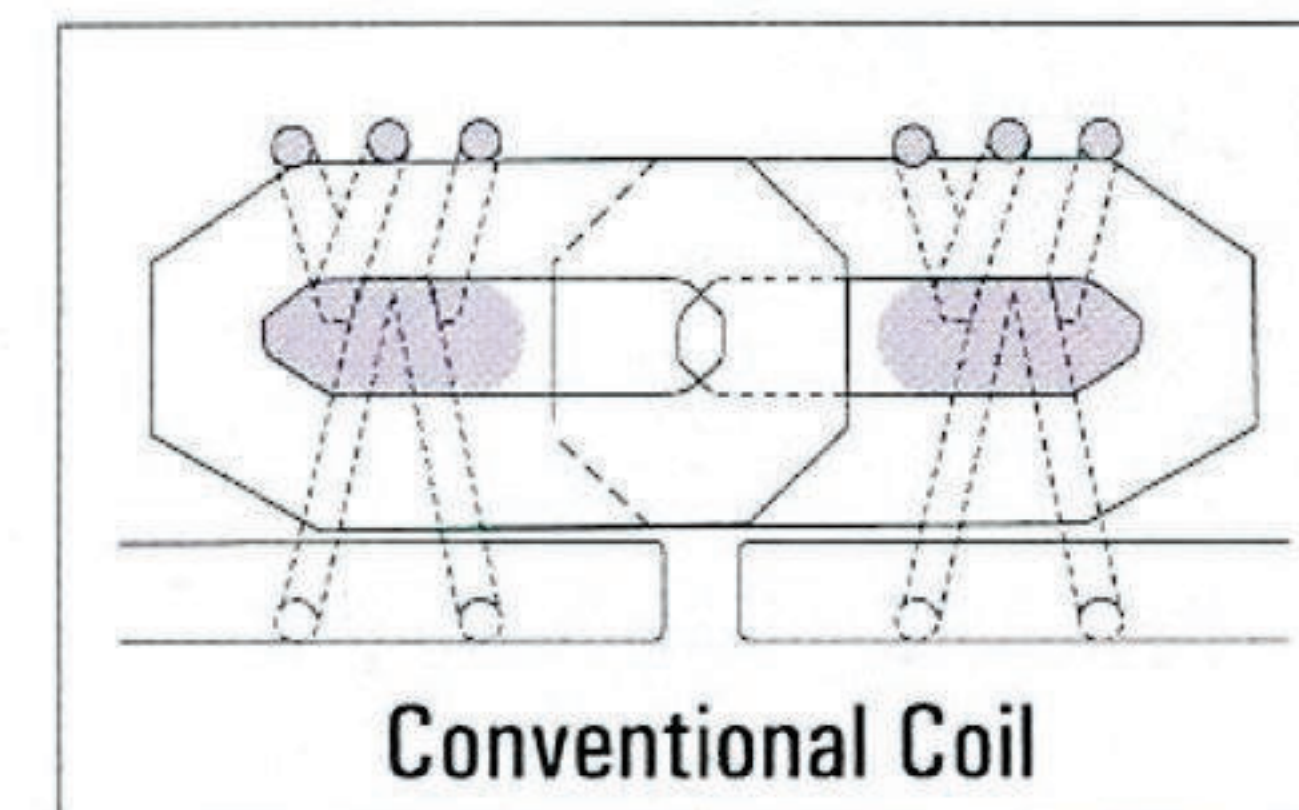

Weisenbeck Abrasion Test*

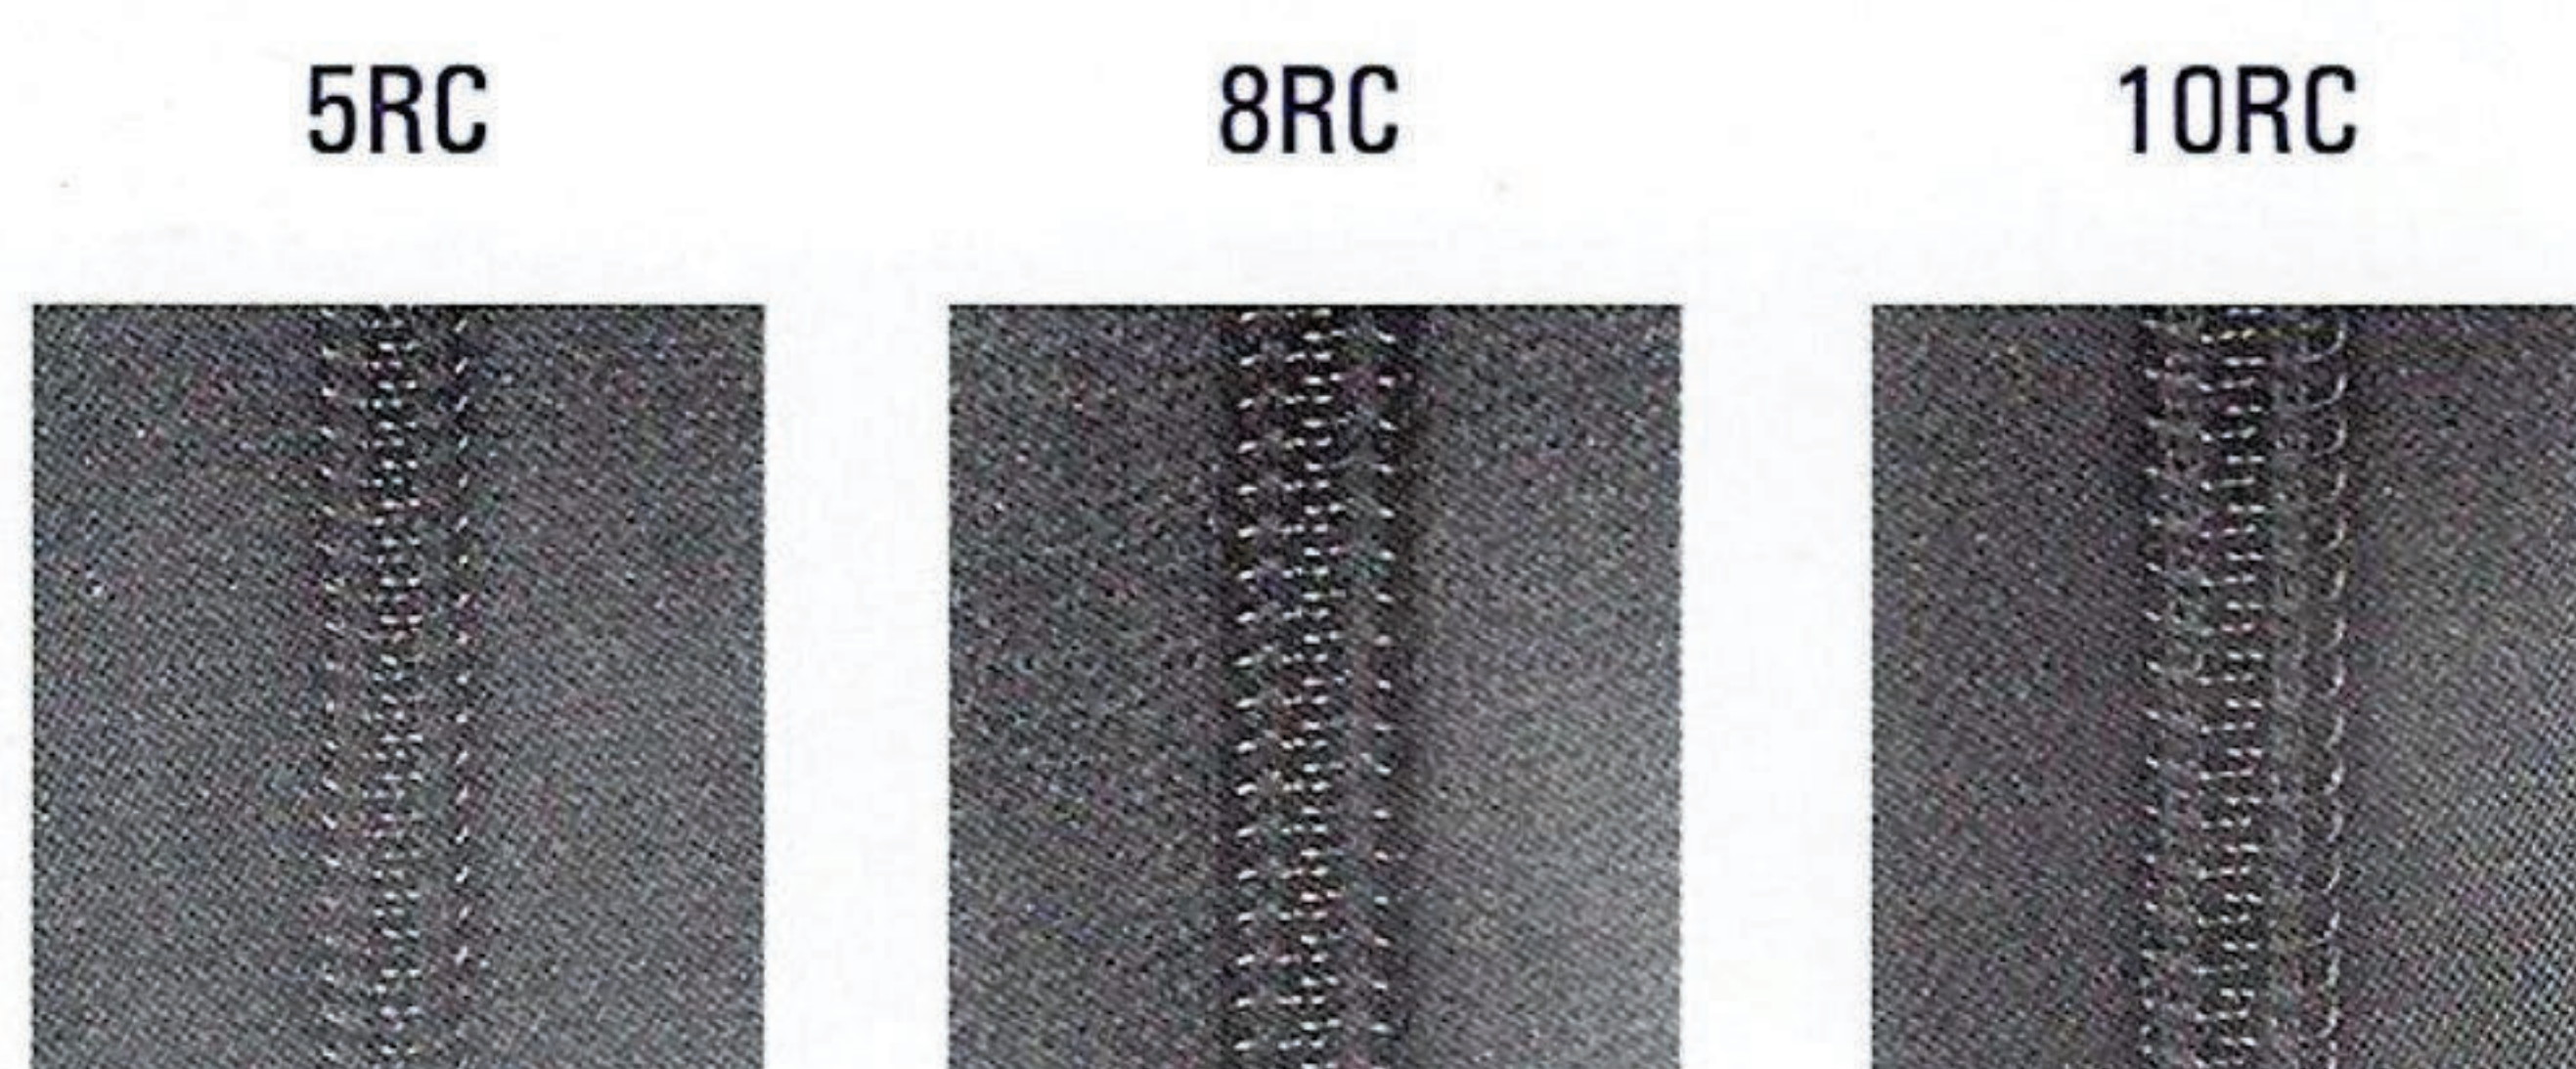

* Zipper cross-wise strength is tested after it is rubbed with sandpaper
to measure its resistance to abrasion.

Unique Shape Meets Diverse Needs.

The new Racquet Coil zipper features a unique oval shape that ensures durability.
And, YKK takes the advanced design to the next level by strategically placing the sewing thread in an indentation
on the oval - thus protecting it from exposure and from being easily torn (Patent pending)

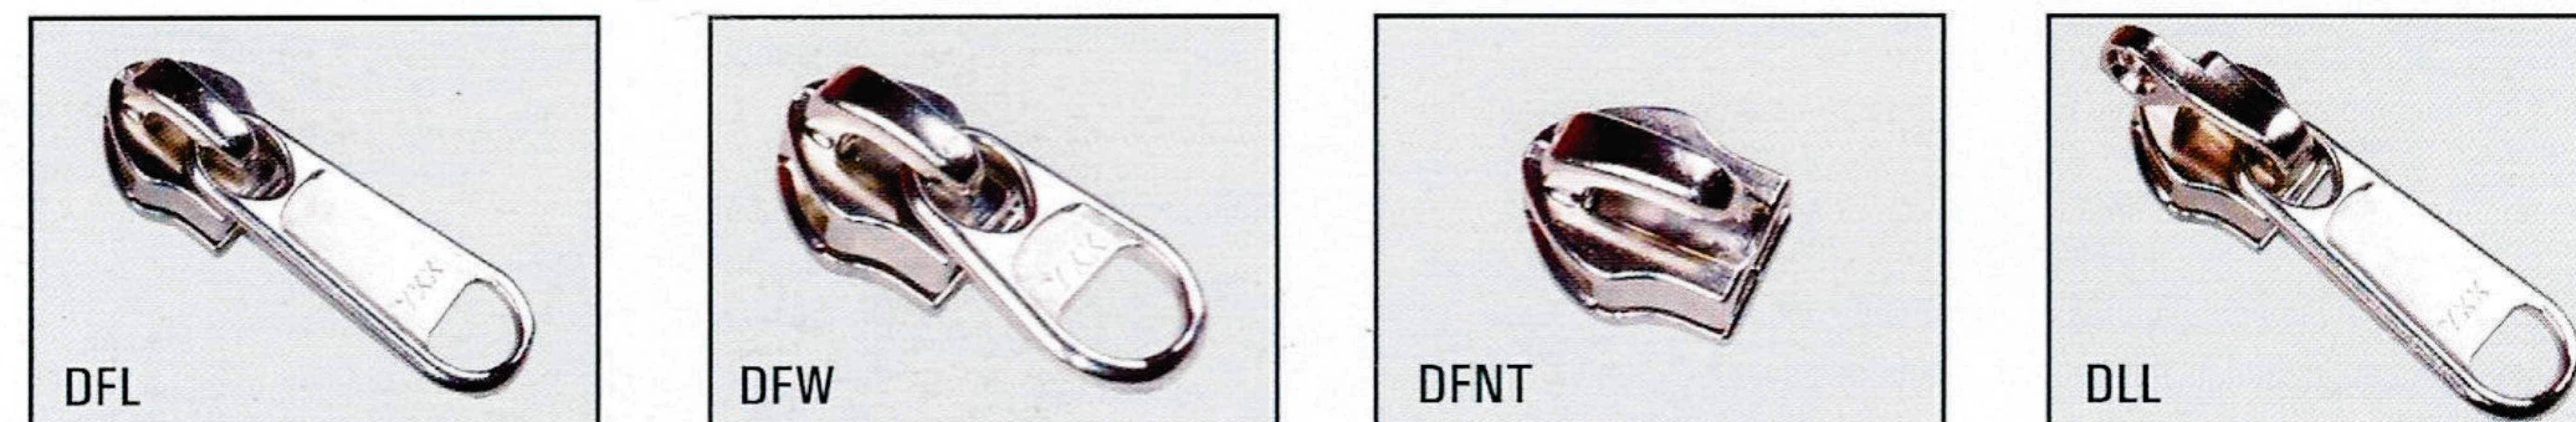

Three Sizes to Meet Diverse Needs.

Improved Slider Appearance.

Heavy Duty (YKK Brand)

Smooth surface and rounded crown give the newly developed sliders a sleek,
stronger look. The integrated padlock version also has a fresh unified design
that doubles the strength of its previous standard slider.

Any Custom Logo or Special Design Pull
is available upon your request.
